

Group Study Room user Guide

To turn on the Plasma screen press the on button on the top left of the Extron control panel.

Now press the button of the source that you want to display: PC or Laptop

Make sure the inbuilt PC is switched on, (blue LED will be lit). Log in using your IT Services username and password. If an error appears, stating that 'No Login Servers Are Available', restart the PC.

If the screen isn't showing the correct input, wait a few seconds and press the source button again, to re-send the command.

You can blank the screen by pressing the "MUTE" button. Pressing it again brings the image back.

If there are any problems with this unit please call the AV department on 3036
